

## 2010 AGC Regional Competition

The KBE Building Committee is inviting your firm to submit a proposal for Construction Management services.

The project will enhance an educational facility located within Region 1 of the United States. The program will include specialized educational training facilities, spaces for demonstration and assembly, and an environment conducive to the growth and development of the facilities inhabitants, administration, and staff.

Systems include structural steel framing, timber framing, unique MEP systems and specialized finishes. There are particular site logistics issues to be solved as well.

KBE will be assessing the following (at a minimum) in your formal submittal:

Project Staffing  
CPM Scheduling  
Client Satisfaction

Project Approach  
Estimate

Safety  
Value Engineering

KBE will also require an oral presentation. It is important to tell us, the owners, what WE need to hear about your team's approach. Our committee is currently finalizing the RFP materials and contract documents for distribution at the competition.

Of course, remember to have fun as you invest in your future!
